## **DETAILED ACTION**

### ***Claim Objections***

The claims are objected to because they include reference characters which are not enclosed within parentheses.

Reference characters corresponding to elements recited in the detailed description of the drawings and used in conjunction with the recitation of the same element or group of elements in the claims should be enclosed within parentheses so as to avoid confusion with other numbers or characters which may appear in the claims. See MPEP § 608.01(m).

Furthermore, the claims are objected to as being incomplete because the claims should be understood without the reference numbers in parentheses. In the instant application, the reference numbers in the claims recite a claim limitation that cannot be determined since the number is only a number and not structure as required.

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1 and 4 are rejected under 35 U.S.C. 103(a) as being obvious over Yang (5,449,079). Yang discloses the limitations of the claims including a cover (figs. 1-7) comprising a shell (2) spherical projection with cylindrical cavity (200), openings (202),

valve head (23), circular plate with triangular edge (annular extending portion of valve 23), gasket (240), sleeve (through hole housing valve 23) with flange (flat portion extending radially outward from sleeve) and rib (portion extending downward from flange), pin (231), bonnet (21) with ribs (upwards extending portion of bonnet 21). Yang excludes what would have been obvious to one of ordinary skill in the art at the time of invention, having an elliptical outline pointed towards the inside of the container in order to facilitate design choice and add an aesthetic element to the container cover. Moreover, a change in form or shape is generally recognized as being within the level of ordinary skill in the art, absent any showing of unexpected results. *In re Dailey et al.*, 149 USPQ 47. A Change in aesthetic (ornamental) design generally will not support patentability. *In re Seid*, 73 USPQ 431.

3. Claims 2 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over the references as described in par. 2 in view of Pan (4,210,255). The references as described in par. 2 disclose the limitations of the claims substantially excluding what Pan teaches, a head valve (fig. 2, 13) being installed loosely in an opening (11) in order to allow air to exit the container. Therefore it would have been obvious to one of ordinary skill in the art at the time of invention to modify the references as described in par. 2 with the aforementioned structural features in order to have an alternate route whereby air exits the inside of said container.

### **Conclusion**

4. Applicant is duly reminded that a complete response must satisfy the requirements of 37 C.F. R. 1.111, including: "The reply must present arguments pointing out the specific distinctions believed to render the claims, including any newly presented claims, patentable over any applied references. A general allegation that the claims "define a patentable invention" without specifically pointing out how the language of the claims patentably distinguishes them from the references does not comply with the requirements of this section. Moreover, "The prompt development of a clear Issue requires that the replies of the applicant meet the objections to and rejections of the claims." Applicant should also specifically point out the support for any amendments made to the disclosure. See MPEP 2163.06 and MPEP 714.02. The "disclosure" includes the claims, the specification and the drawings.
